the challenge

MINGLE is a project which attempts to facilitate the active citizenship and the integration of third-country nationals (TCNs) through the collaboration and networking with different social agents of the host community (generating social and human capital).

This has an effect on:

- ➔ An active interaction between TCNs and locals which has as a result a greater TCNs' integration in the society.
- ➔ The empowerment of TCNs who participate, through the improvement of their language skills, personal competences and social skills, as well as through a better understanding of the community and the available resources.
- ➔ As a consequence, the improvement of their economic, labour, social, etc. individual perspectives.
